

Safe Choice

Safety MessageMats™ capture 80% of the dust, dirt, and moisture tracked into buildings on customers' & employees' shoes. These colorful, attractive mats are made of soil grabbing, high twist solution dyed nylon yarn with a non-skid nitrile rubber backing. In addition to collecting soil, they also provide employees with valuable reminders of the importance of safety. This increased awareness can lead to fewer accidents and reduced workers compensation claims.

Available in a variety of designs and colors, Safety MessageMats are regularly exchanged by rental service companies to insure they remain clean and fresh. Mats are one of the best investments a business can make. By reducing floor maintenance costs and helping improve safety records, Safety MessageMats will pay for themselves.
